

SharePoint 2013

**Out of the box features that can improve
your Housing Association**

Richard Gray
24th April 2013

SharePoint 2013

What is SharePoint?

- Document Management
- Collaboration
- Content Management
- Business Process Automation (BPA)
- Search

Typical applications of SharePoint in Housing Associations

- Intranets
- Staff Directory
- Replace paper forms with online forms - BPA
- Teams working together
- Knowledge Base
- Portals
 - Resident Portals
 - Supplier Extranets
- Web Sites

Benefits of SharePoint

- Reduced use of email
- Less duplication
- Easier to find information and people
- Efficiency and less paper

What I'm going to cover

- Introduction to Parabola Software
- Changing the look of the site – Design Manager
- Search and the value of Metadata
- SharePoint Apps and the App Store
- Mobiles and Tablets – Smart Devices support
- Community Sites

Search in 2013

- New features
 - Continuous Crawl
 - Search for People, Videos and Conversations

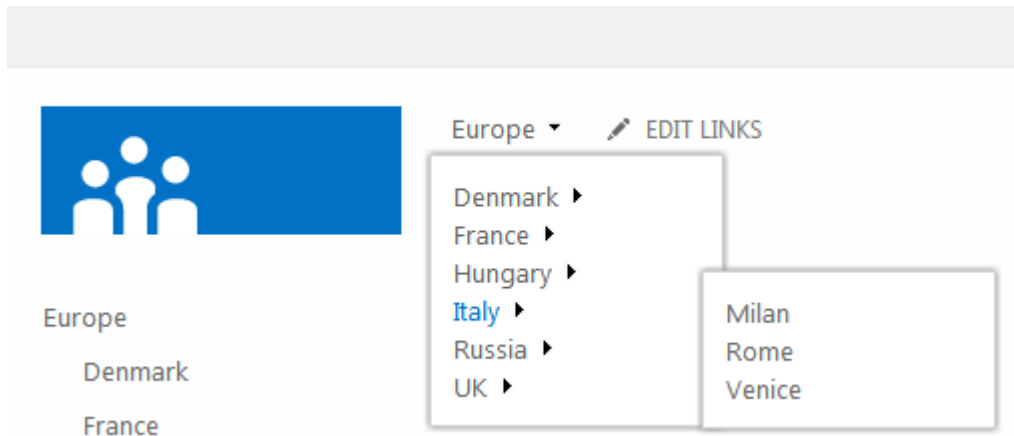

Demo

- Composed Looks
- Search

Information Architecture Design

- The key to success with SharePoint
- An area where experience and expertise make the difference

The Importance of IA to SharePoint Implementations

FORRESTER®

“SharePoint buyers expect intuitive navigation, contextual search, and easy administration out of the box. But such benefits depend on how content is structured, labelled and categorized”

“The information architecture behind a SharePoint deployment has lasting consequences for the end user experience and for Web site management”

- February 24, 2009

By Leslie Owens, Rob Koplowitz with Matthew Brown, Norman Nicolson

SharePoint 2013 Apps and the App Store

SharePoint Store

- 3rd party and internal web parts
- May be hosted on a different server

Demo – SharePoint Apps

SharePoint Store

Supporting Smart Devices

- That BYOD and Smart Devices thing
 - There are more mobiles in the world than PCs
 - People will try to access the portal on Smart Devices
- SharePoint 2013 offers a number of optimised views to support Smart Devices

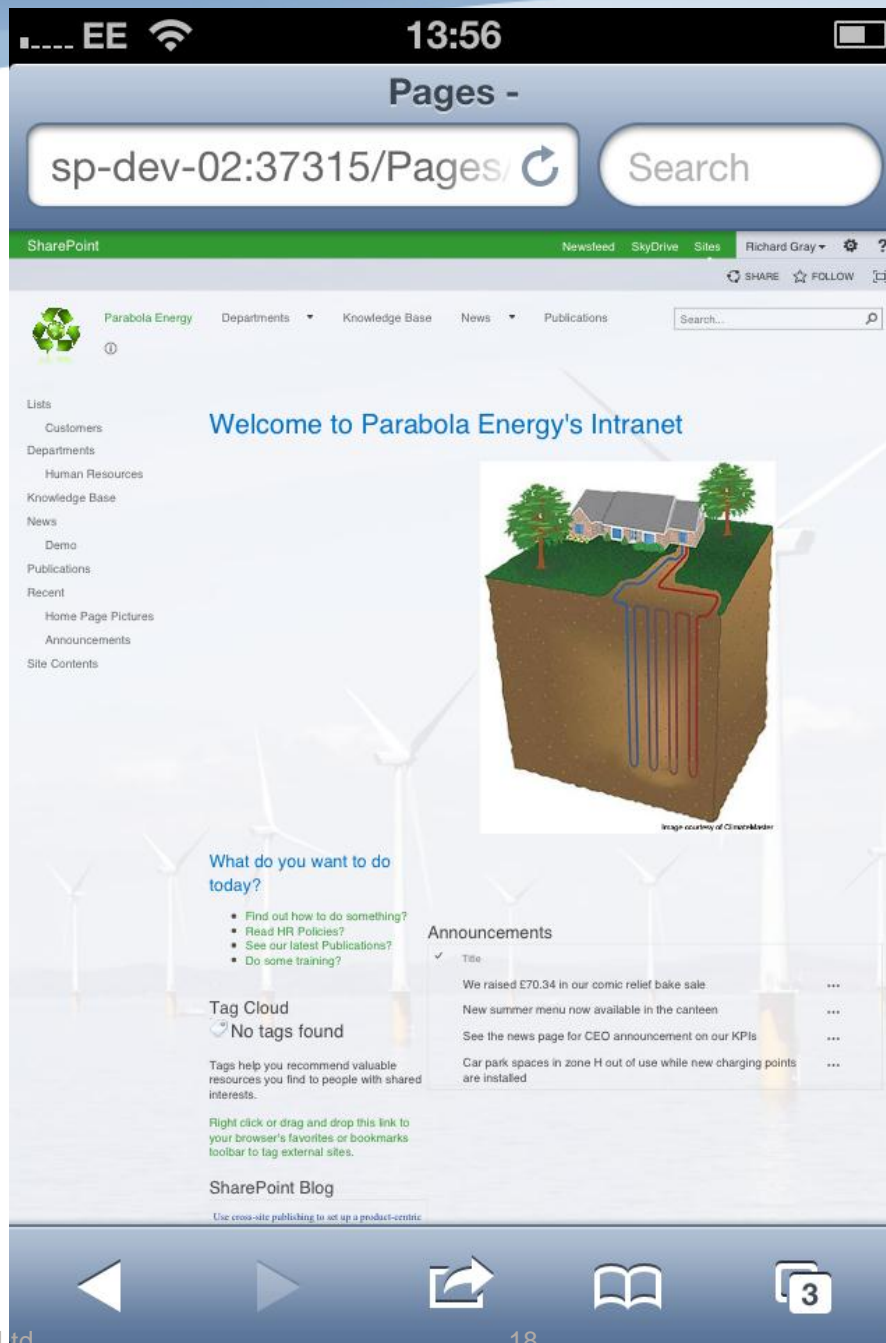

SharePoint 2013 – support for Smart Devices

- Out of the Box
 - PC View
 - Classic (same as 2010 mobile view)
 - Contemporary View
- Custom Options
 - HTML 5 support - Responsive Web Design
 - Device Channels

PC View on a Mobile

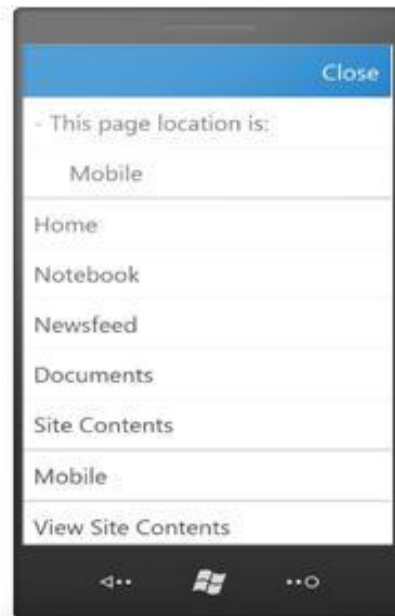

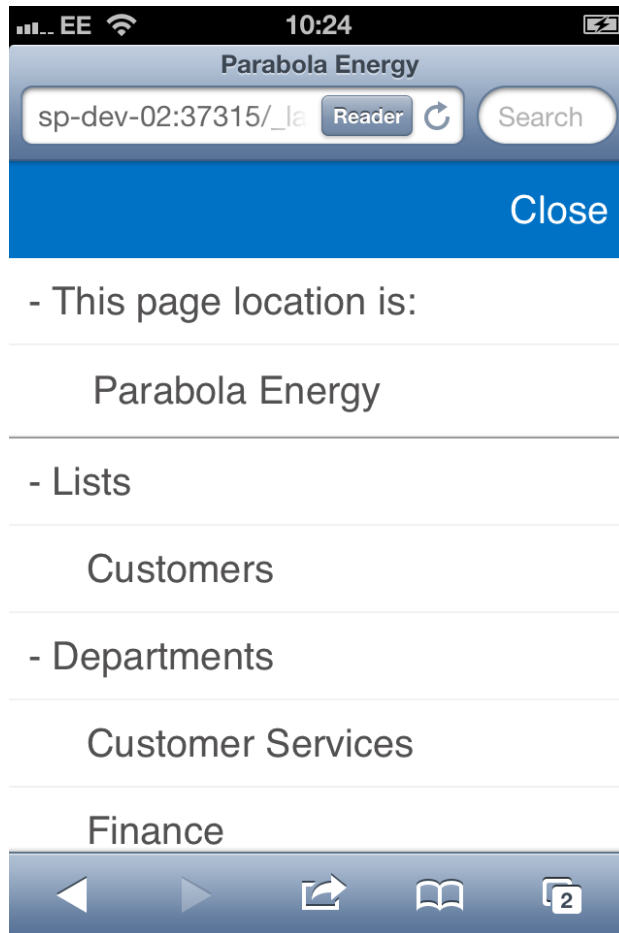

Classic View for Mobiles

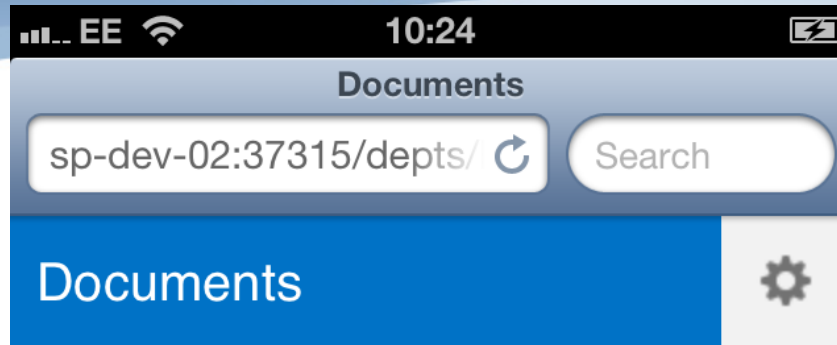

Contemporary View for Mobiles

Contemporary View – iPhone

Custom options view for Smart Devices

- Device Channels
- Responsive Web Design using HTML 5

A company social network

- Harness your employee's knowledge
- Find expertise
- Encourage collaboration

The image displays a SharePoint social network interface. At the top, there's a blue header with the 'SharePoint' logo. Below it, a user profile for 'Garth Fort' is shown. The main content area is a 'Newsfeed' with posts from various users. A sidebar on the left contains navigation links like 'About me', 'Tasks', 'Recent', 'EDIT LINKS', and 'Site Contents'. A mobile app view is shown at the bottom, displaying a 'Newsfeed' with posts from 'Lori Penor', 'Anna Misiec', and 'Adam Carter'. On the right, there's a section for 'I'm following' with counts for people (22), documents (5), sites (8), and tags (5). Below this is a 'Trending #tags' section with tags like 'marketing excellence awards', 'Xt2000', 'product designs', 'TGIF', and 'feedback'.
